	Applicable Fees	incentivizes validators to secure the network and	
		validate transactions by staking their own crypto-	
		assets as collateral. Validators are selected to create	
		new blocks based on the amount of cryptocurrency	
		they hold and are willing to 'stake', rather than	
		through computational power. If validators act	
		honestly, they earn rewards through transaction	
		fees; however, malicious behavior or proposing	
		invalid blocks can lead to a reduction of their staked	
		assets, creating an economic penalty that	
		discourages misconduct and ensures network
